Course Overview

The Medical Nutrition Therapy in Allergy and Food Intolerance course is a collaboration between the Centre for Advanced Learning (part of the Dietitians Association of Australia) and the Australasian Society of Clinical Immunology and Allergy (ASCIA).

Discover the immunology and pathophysiology of allergy, and increase your confidence in the nutritional management of food allergy and other adverse food reactions.

This course is designed specifically for dietitians, including emerging dietitians and students.

Leave this course with

- An understanding of immunology and pathophysiology of allergy
- Skills and knowledge in nutritional management of food allergy and other adverse food reactions
- Recommendations, guidelines and evidence-based literature to add to your toolkit
- A network of dietitians working in the field of food allergy and intolerance
- At least 15.5 hours of assessed Continuing Professional Development (CPD) *
- A Certificate of Attendance (students) or Professional Certificate (graduated dietitians)

* CPD hours can be logged if course content aligns with your APD learning goals

The Centre for Advanced Learning is an initiative of the Dietitians Association of Australia offering innovative short courses in high-demand topic areas, designed to build and develop skills and knowledge for both dietitians and health care professionals.
